DESCRIPTION

Kibow Flora™ is a highly effective probiotic supplement that contains 30 billion live probiotic bacteria per capsule which lasts until the date of expiration when stored at 4 degrees Celsius. This supplement is 100% natural and is enteric coated to ensure that the probiotic bacteria are not destroyed by gastric or bile acids before they are released into the bowel. Highly specific microbial strains help to reduce the various symptoms of metabolic syndrome. The product also helps digestion and promotes intestinal function in healthy individuals.

GERIATRIC APPLICATIONS

Kibow Flora™ helps restore the quantity of 'good' intestinal microflora in the large bowel, strengthening the immune system. According to research studies, the elderly have a thousand fold less microflora in their bowel compared to a young adult. These microflora are responsible for boosting immunity and overall well-being of a person. Kibow Flora™ is also recommended to help restore intestinal microflora after treatment with antibiotics.*

DOSAGE AND ADMINISTRATION

Take one capsule twice daily with meals or as recommended by your healthcare professional

SIDE-EFFECTS

Probiotics are generally regarded as safe for consumption. The gel cap product is more efficacious when taken immediately after each meal. Side effects, if they occur, are mild (such as gas or flatulence) and usually disappear after two or three weeks of continuous usage.

Our product is manufactured in cGMP facility that also process products containing peanuts, tree nuts seeds, grains, eggs crustacean and dairy products.

Kibow Flora™

- Supports Immune Function
- Augments 'good' intestinal microflora the bowel especially in the elderly.
- High potency and enteric coated
- Vegetarian capsules individuals

PROPRIETARY PROBIOTIC FORMULATION OF KIBOW FLORA™
